

ENVIRONMENTAL POLICY

The environmental policy of Energy Works Technology Ltd is to make our operations, environmental friendly. This, we shall achieve by formulating and implementing procedures, which avoid adverse impact on our environment, and mitigate those impacts, which are unavoidable. This policy also strives to conserve and enhance, whenever possible, the resources derived from our environment.

It is the Company's policy to: -

- Comply with all applicable Nigerian environmental laws and regulations.
- Maintain a self-monitoring programme to ensure continued compliance.
- Assist all levels of government in the promulgation and revision of environmental protection regulations based on scientific facts that are economically and operationally feasible.
- Consider the expense of environmental protection as a legitimate cost of conducting business in a modern society.
- Achieve environmental protection by employing the best control mechanisms, processes and procedures, which have been proven technically sound and economically feasible.
- Train our employees to be aware of the impact of their assignments on the environment and to assume responsibility for environmental protection and conservation at their level.

It is the goal of EWT to make the company's activities harmonious with the environment as it exists. Our environmental philosophy is explicit; no task will be undertaken unless it can be accomplished in an environmentally friendly manner and in compliance with all applicable laws and regulations.

Compromising Environmental laws by company or contractor operations will not be tolerated. It is expected that all company and contractor employees will actively support this environmental policy and accept environmental protection as an integral part of his or her responsibility.

A handwritten signature in blue ink, appearing to read 'Dules', is written over a horizontal dashed line.
